

Calibrating the Sticker Printer – Full Book of Yellow Sticker Stock

Sticker Printer Control Buttons

Power	Pause	Feed	Cancel
			

To calibrate your sticker printer to begin printing stickers using a full book of yellow sticker stock, follow these steps:

Load a full book of yellow sticker stock in the printer. There will be 4 stickers marked “VOID FOR PRINTER ALIGNMENT” at the beginning of the stack.

Close the printer. Press the Pause button and the Cancel button at the same time and hold them down until the Sticker stock begins to feed through the printer.

Release both buttons as soon as the Stickers start to move.

The sticker stock will stop feeding automatically. Once it stops, open the printer lid and pull the Sticker stock back, so the first Sticker is at the edge of the printer.

Press the Pause button one time and press the Feed button three times. The four “void” stickers will feed out and then stop.

Tear these stickers off and discard. Your printer is ready to go!
